SUMMARY

Fresh graduate in Informatics from Telkom University (GPA 3.34) with a strong interest and hands-on experience in Data Analysis, Data Engineering, Backend Development, and Web Development. Experienced as an intern at Toyota Astra Motor and BP Batam, and participated in the Kampus Merdeka program (MSIB 6), gaining exposure to data processing, dashboard development, and business analytics. Proficient in Python, SQL, Power BI, Go, PHP, Laravel, and C++, with strong skills in data cleaning, exploratory data analysis (EDA), and data visualization to generate actionable insights. Comfortable working with large-scale data and collaborating effectively within cross-functional teams.

SKILLS

- **Data & Analytics:** Exploratory Data Analysis (EDA), Data Cleaning, Data Preprocessing, Predictive Analytics, Reporting, Excel
- **Data Visualization**: Power BI, Dashboard Development, Data Storytelling
- **Data Engineering:** Data Pipeline Development, ETL, Data Scraping, REST API Integration
- **Tools & Programming**: Python, SQL, Golang, PHP, and other
- **Database**: MySQL, PostgreSQL
- **Web & Backend:** Laravel, Golang
- **Language:** English, Indonesia

WORK EXPERIENCE

PT. Toyota-Astra Motor - Data Analyst Fleet Management (Internship) **(Oct 2025 - Dec 2025)**

- Developed and maintained Sales & Aftersales dashboards using Power BI to monitor fleet sales performance, sales trends, and operational KPIs
- Optimized dashboard performance by reducing loading time from ~45 seconds to 10 seconds through data model improvements, removal of unnecessary calculated columns, and DAX optimization
- Designed and implemented a Python-based data cleaning pipeline to automate preprocessing and improve data accuracy and consistency across multiple sources
- Performed regular data updates to ensure data quality and support ongoing operational and business analysis activities

Badan Pengusahaan Batam (BP Batam) - Backend Developer (Internship) **(Jun 2024 - Aug 2024)**

- Developed RESTful APIs using PHP to support data management for the SPPD Mobile system (Surat Perintah Perjalanan Dinas)
- Designed the SPPD Mobile database using MySQL with integrated relational tables to store application data
- Implemented API security via parameterized queries to prevent SQL injection, CORS configuration, and structured JSON response standards

Ruangguru, Kampus Merdeka (MSIB 6) - AI Integration In Backend Application Development **(Feb 2024 - Jun 2024)**

- Developed RESTful backend services using Golang, applying clean architecture principles, middleware, and error handling
- Designed and optimized a PostgreSQL database through normalization, indexing, and query optimization (JOINs), integrated via ORM (GORM) for efficient data management.
- Implemented JWT-based authentication and authorization to secure application endpoints

ORGANIZATIONAL EXPERIENCE

Carnival HIMAIF (Informatics, Telkom University) - Logistics Division Staff **(Oct 2023 - Nov 2023)**

- Managed venue permits and assisted in coordinating logistics operations (procurement, vendor management, and event supply distribution)

- Collaborated with multiple divisions and external parties to ensure events ran on time and within budget

Batavia On Telkom (Telkom University) - Logistics Division Staff **(Oct 2022 - June 2023)**

- Handled venue permits and vendor coordination to support event execution
- Managed procurement and logistics needs to ensure smooth multi-day event operations

PROJECTS

Network Anomaly Detection Research - IEEE 9th ICSECS Conference 2025

- Developed and evaluated a Deep Q-Learning (DQN) model for adaptive network intrusion detection, achieving 99.09% accuracy and an F1-score of 0.9918 on the UNSW-NB15 dataset.
- Demonstrated the model's capability in detecting zero-day attacks with minimal performance degradation, contributing to cybersecurity research

Fleet Sales Dashboard Power BI – Toyota Astra Motor Internship Project

- Built a comprehensive dashboard to monitor Toyota Fleet sales performance, providing visualizations of sales target achievement, period-over-period comparisons, and in-depth analysis by customer segment and vehicle model

Bakery Sales Data Analysis - RevoU Mini Course Project

- Analyzed bakery transaction data for January 2021 to identify peak sales periods and best-selling products.
- Provided data-driven recommendations to optimize weekend production and improve inventory management to reduce operational waste

SPPD (Surat Perintah Perjalanan Dinas) Mobile BP Batam - BP Batam Internship Project

- A Flutter-based mobile travel order management system integrated with a PHP backend and MySQL database, designed to streamline business trip administration including SPPD creation, companion management, and travel cost calculation

EDUCATION

S1 Informatika - Telkom University (3.34 / 4.00) **(Sep 2021 - Aug 2025)**

CERTIFICATIONS

- Becoming Data Engineer : Teori, Praktek dan Mini Project - Dunia Coding (2026)
- Data Analytics and Visualization Bootcamp - Dsarea (2026)
- Introduction to Data Analytics - RevoU Mini Course (2026)
- IEEE 9th International Conference on Software Engineering & Computer Systems (ICSECS) - Published Author (2025)
- Laravel 11 Web Developer Bootcamp - Sanbercode (2025)
- Kampus Merdeka MSIB Batch 6 - AI Integration in Backend Application Development (2024)
